## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-32,46,47,49,50, drawn to an apparatus/method/program for providing an action plan information to the user based on the time/date, classified in class 709, subclass 217.
  - II. Claims 33-45,48,50 drawn to an apparatus/method/program for providing data to the user based on the position of the user module, classified in class 701, subclass 207.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as providing data to the user based on the location of the user whereas invention I has separate utility such as providing data to the user based on the time/date.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination \*c1001D purposes as indicated is proper. See MPEP § 806.05(d).

3. A telephone call was made to Jean Edwards on 10/5/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2187

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
